

Joseph Bae

M.D./Ph.D. Student

joseph.bae@stonybrookmedicine.edu
<https://joseph-bae.github.io/>

EDUCATION

Stony Brook University, Stony Brook, NY

Ph.D., Biomedical Informatics, July 2021-Present

Selected Coursework: Statistics; Computer Science; Data Analytics and Software Stacks; Computer Vision

Stony Brook University, Stony Brook, NY

Doctor of Medicine, August 2019-Present

Selected Coursework: Molecular Foundations of Medicine, Human Anatomy, Human Pathophysiology
MCAT: 523

University of Southern California, Los Angeles, CA

Master of Science, Medical Biophysics, December 2016-December 2018

Thesis: *Exploring the effects of CXCR4 inhibition on circulating tumor cell populations in metastatic prostate cancer*

University of Southern California, Los Angeles, CA

Bachelor of Science, Biophysics, August 2014-May 2018

Magna Cum Laude

SKILLS

Programming/Scripting Languages: (Fluent) Python, MATLAB; (Familiar) Lua, Java, C++, R, Javascript, SQL

Frameworks/Tools: PyTorch, Tensorflow, Git, Microsoft Office, Sony Vegas, Inkscape

Wet Lab: Immunofluorescence, PCR, cell culture

EXPERIENCE

Ph.D. Student Researcher

Department of Biomedical Informatics, Stony Brook University, December 2019 - Present

- Research and create tools for data processing and machine learning modeling of imaging and radiotherapy treatment data for cancer patients under Dr. Prateek Prasanna. Work published in top conferences (CVPR, ICCV, MICCAI, etc.) and journals (see pages 2-3 for full list of publications).

Computer Vision Intern

Siemens Healthineers, Malvern, PA, May 2024 - December 2024

- Developed approaches for few-shot and unsupervised segmentation of volumetric medical images leveraging foundation models. Presented at MEDAGI@MICCAI 2024. Provided in-person anatomy lectures for research scientists covering human physiology and pathology.

Science Officer

PathCheck Foundation, Massachusetts Institute of Technology, August 2020 - February 2021

- Led a multinational team of scientists, doctors, and engineers to develop digital systems for equitable COVID-19 vaccine distribution in the US and other countries (patent pending). Served on the leadership committee for the Vaccines for All Conference hosted at MIT.

Student Researcher

Convergent Sciences Institute in Cancer, University of Southern California, May 2015 - December 2018

- Conducted research on circulating tumor cells in colorectal and prostate cancer using wet lab and computational techniques as a member of the Kuhn Lab. Member of the inaugural class of the Bridge Undergraduate Scientist Program. Assisted in organizing undergraduate researchers and volunteers.

Projects

RADGRAPH

Stony Brook University, 2025q1

- Trained models for graph-based machine learning analysis of 3D CT images for cancer recurrence prediction on large, multi-institutional datasets. Received Trainee Research Prize at RSNA. Manuscript in press in *Radiology: Imaging Cancer*.

Joseph Bae

M.D./Ph.D. Student

joseph.bae@stonybrookmedicine.edu

<https://joseph-bae.github.io/>

Projects (continued)

SAMU

Siemens Healthineers, 2024q2

- Created an efficient foundation model for volumetric medical image segmentation capable of being run on limited GPU resources. Developed during summer intern research with Siemens Healthineers. Presented and published at MEDAGI@MICCAI 2025.

Spatial Radiomics for Brain Metastases Recurrence

Stony Brook University, 2024q2

- Developed a framework for spatial-radiomics modeling of time-to-recurrence for brain metastases patients using 3D MRI imaging and radiation treatment data. Published in *Advances in Radiation Oncology*.

Beating the Streak

Stony Brook University, 2022q3

- Created a system to model batter hitting streaks in Major League Baseball (MLB) using machine learning models and MLB APIs. Developed both backend and frontend for a public-facing website showcasing model predictions.

Awards

- Trainee Research Prize – RSNA 2023
- Facebook COVID-19 Symptom Data Challenge Finalist
- Stanford Biodesign Hackathon 2020 - Best COVID-19 Project Award
- USC Trustee, University, Asian Pacific American Scholarships
- Rose Hills Foundation, USC Provost, Dornsife Scholar, Discovery Scholar Research Fellowships
- Phi Beta Kappa Member
- National Merit Scholar
- Warren Bennis Scholar

Publications

Journal Papers

Bae, J.; Mani, K.; Czerwonka, L.; Vanison, C.; Ryu, S.; & Prasanna, P. (2025). Spatial Radiomic Graphs for Outcome Prediction in Radiotherapy-Treated Head and Neck Squamous Cell Carcinoma Using Pre-Treatment CT. *Radiology: Imaging Cancer*. (Accepted for publication)

Singh, G.; Singh, A.; **Bae, J.;** Manjila, S.; Spektor, V.; Prasanna, P.; & Lignelli, A. (2024). New frontiers in domain-inspired radiomics and radiogenomics: increasing role of molecular diagnostics in CNS tumor classification and grading following WHO CNS-5 updates. *Cancer Imaging*.

Bae, J.; Mani, K.; Zabrocka, E.; Cattell, R.; O'Grady, B.; Payne, D.; Roberson, J.; Ryu, S.; & Prasanna, P. (2024). Pre-treatment Spatially-Aware MRI Radiomics Can Predict Distant Brain Metastases (DBMs) Following Stereotactic Radiosurgery/Radiation Therapy (SRS/SRT). *Advances in Radiation Oncology*.

Bae, J.; Kapse, S.; Singh, G.; Gattu, R.; Ali, S.; Shah, N.; Marshall, C.; Pierce, J.; Phatak, T.; Gupta, A.; Green, J.; Madan, N.; Prasanna, P. (2021) Predicting Mechanical Ventilation and Mortality in COVID-19 Using Radiomics and Deep Learning on Chest Radiographs: A Multi-Institutional Study. *Diagnostics*.

Khullar, R.; Shah, S.; Singh, G.; **Bae, J.;** Gattu, R.; Jain, S.; Green, J.; Anandarangam, T.; Cohen, M.; Madan, N.; & Prasanna, P. (2020). Effects of Prone Ventilation on Oxygenation, Inflammation, and Lung Infiltrates in COVID-19 Related Acute Respiratory Distress Syndrome: A Retrospective Cohort Study. *Journal of Clinical Medicine*.

Conference Papers

Bae, J.; Kapse, S.; Zhou, L.; Mani, K.; & Prasanna, P. (2024). HoG-Net: Hierarchical Multi-organ Graph Network for Head and Neck Cancer Recurrence Prediction from CT Images. MICCAI 2024.

Bae, J.; Guo, X.; Yerebakan, H.; Shinagawa, Y.; & Farhand, S. (2024). SAMU: An Efficient and Promptable Foundation Model for Medical Image Segmentation. MEDAGI@MICCAI 2024.
